

Qdata® Melanoma is an exclusive dataset providing clear insight into disease characteristics, treatment decisions across stages of care, and outcomes across academic and community care settings.

Verana Health® powers oncology research with high-quality real-world data sourced from curated electronic health records and linked data sources at leading cancer centers across the US. Built specifically for cancer research, Verana Health's oncology datasets and analytics deliver clinically rich insights across tumor types and lines of therapy, supporting evidence generation at every stage of the drug development and commercialization lifecycle.

Abstracted Data

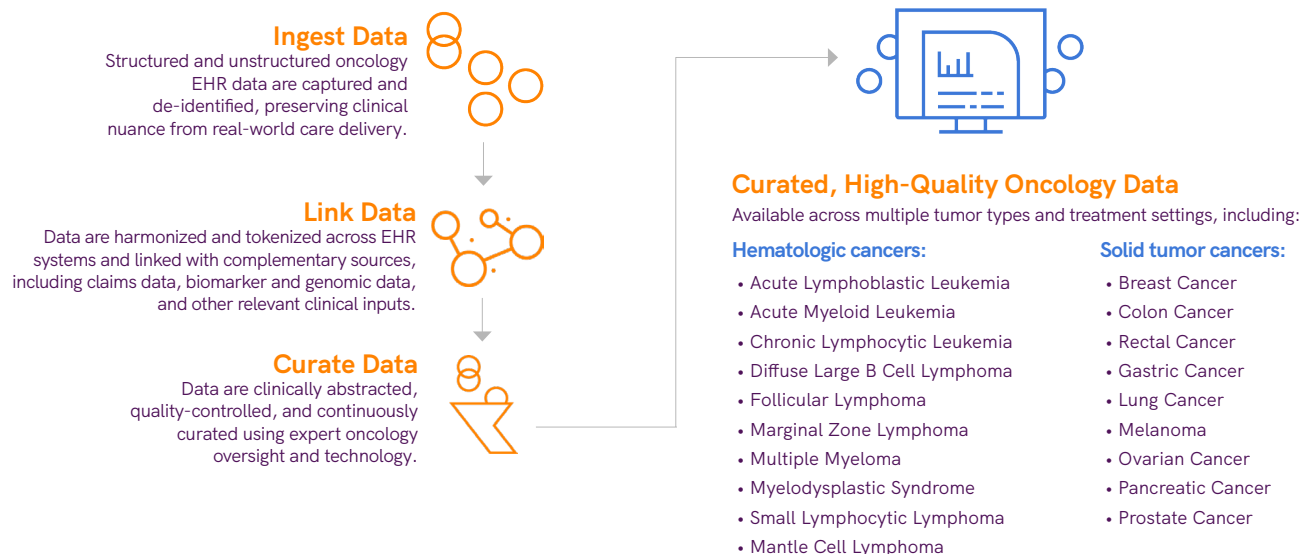

ABSTRACTED	ACCESSIBLE	ABSTRACTED + ACCESSIBLE
3,490	29,150+	32,640+

Potential patients as of Q2 2026

Note: Abstracted data is available for immediate delivery. Accessible data requires additional curation.

Clinician-led and AI-enabled oncology data platform

Verana Health securely ingests, links, and curates raw oncology care data from point-of-care clinical encounters. Purpose-built, fit-for-purpose data is designed to support rigorous research and confident decision-making across the oncology lifecycle.

Abstracted Data Summary:

DATA SET QUALITY

4.2 yrs	Average length of follow-up	93%	Patients with race data
11.7	Performance statuses on avg. per patient	90%	Patients with ethnicity data
91%	Metastatic patients with outcome data	68%	Patients seen at an academic center

TREATMENT HIGHLIGHTS

1L+ LOT	870
2L+ LOT	326
3L+ LOT	148
Immunotherapy	1,167
Immunotherapy in Adjuvant Setting	1,061

STAGE AT DIAGNOSIS

Stage 1	864
Stage 2	585
Stage 3	653
Stage 4	382

MOLECULAR HIGHLIGHTS

BRAF+	530
-------	------------

1,032 Total Metastatic

Total **3,490**

About Verana Health

Verana Health, Inc.® is a digital health company revolutionizing patient care and clinical research by utilizing physician expertise and artificial intelligence to unlock the true potential of real-world data. With exclusive access to the world's largest patient data sources in oncology, ophthalmology, neurology, and urology. Verana Health is powering real-world evidence generation. Clinicians utilize these insights to improve the quality of care and quality of life for patients, and life sciences companies rely on the insights to accelerate the development of new therapies.
