

Qdata® Multiple Myeloma is an exclusive dataset providing a clear view of how patients are treated over time, including lines of therapy, transplant decisions, and outcomes in the real world.

Verana Health® powers oncology research with high-quality real-world data sourced from curated electronic health records and linked data sources at leading cancer centers across the US. Built specifically for cancer research, Verana Health's oncology datasets and analytics deliver clinically rich insights across tumor types and lines of therapy, supporting evidence generation at every stage of the drug development and commercialization lifecycle.

Abstracted Data

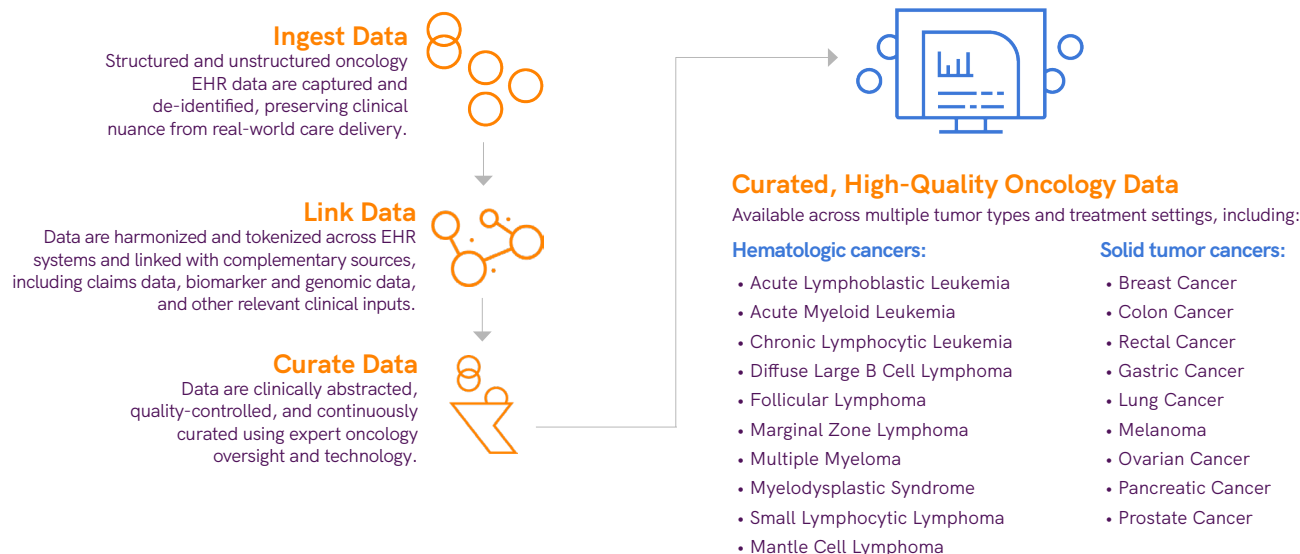

ABSTRACTED	ACCESSIBLE	ABSTRACTED + ACCESSIBLE
15,780	23,700+	39,480+

Potential patients as of Q2 2026

Note: Abstracted data is available for immediate delivery. Accessible data requires additional curation.

Clinician-led and AI-enabled oncology data platform

Verana Health securely ingests, links, and curates raw oncology care data from point-of-care clinical encounters. Purpose-built, fit-for-purpose data is designed to support rigorous research and confident decision-making across the oncology lifecycle.

Abstracted Data Summary:

DATA SET QUALITY

5.4 yrs	Average length of follow-up	96%	Patients with race data
30.6	Performance statuses on avg. per patient	94%	Patients with ethnicity data
82%	Patients with performance Status		

TREATMENT HIGHLIGHTS

Triple Class Exposed	5,989
Autologous Transplant	7,535
Allogeneic Transplant	289
CAR-T Cell Therapy	741
Received BCL-2 or BTK Inhibitor	351
2+ LOT	9,738
3+ LOT	6,360

TOP DISEASE SUBTYPES

Kappa Free Light Chain	15,392
Lambda Free Light Chain	15,372
Del17p/mutation in TP53	1,993

About Verana Health

Verana Health, Inc.® is a digital health company revolutionizing patient care and clinical research by utilizing physician expertise and artificial intelligence to unlock the true potential of real-world data. With exclusive access to the world's largest patient data sources in oncology, ophthalmology, neurology, and urology. Verana Health is powering real-world evidence generation. Clinicians utilize these insights to improve the quality of care and quality of life for patients, and life sciences companies rely on the insights to accelerate the development of new therapies.
