

Qdata® Diabetic Retinopathy is an exclusive dataset with a detailed view of the patient journey including disease progression to Diabetic Macular Edema (DME), Anti-VEGF treatment patterns and outcomes and more.

Verana Health® delivers meaningful insights by ingesting, curating and analyzing real-world data from the American Academy of Ophthalmology IRIS® Registry (Intelligent Research in Sight) and linking it with other data sources such as claims and ophthalmic images.

✔ **Exclusive Diabetic Retinopathy Insights**
Only found here

✔ **Detailed View of Anti-VEGF Treatment**
Across diabetic retinopathy and DME patients

✔ **Comprehensive View into the Patient Journey**
Key variables including visual acuity and CST

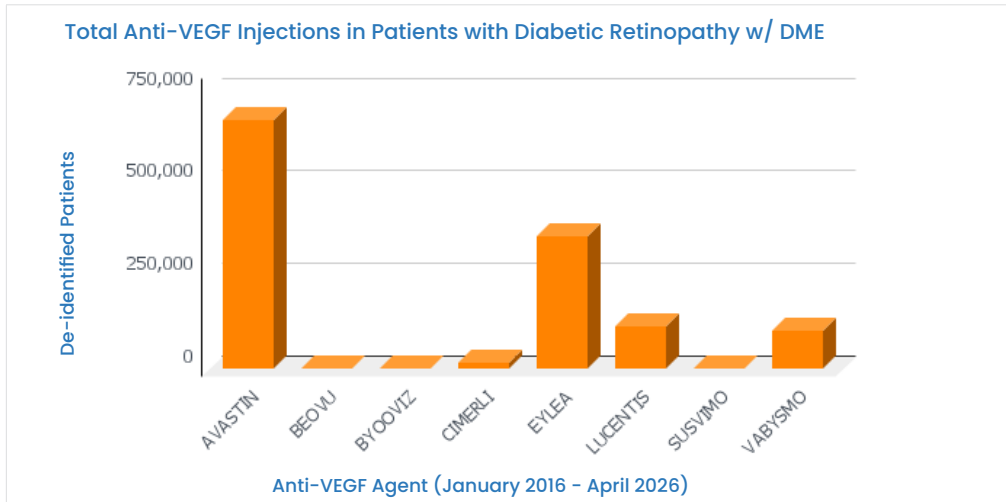

Total in Qdata Diabetic Retinopathy:

2.8M+ Patients with Diabetic Retinopathy (without DME)*	3.5 Median length of follow-up
1.4M+ Patients with Diabetic Retinopathy with DME**	3.6 Median length of follow-up
*Defined as patients >=18 with >=1 ICD-10 code for Diabetic Retinopathy from January 2016 to April 2026, with a corresponding CPT or HCPCS code on the same date as the diagnosis. **Patients not mutually exclusive.	

Key Variables

Variable	Details
Visual Acuity	Visual acuity (VA) measures how sharp your vision is at a distance. It is usually tested by reading an eye chart. VA is an outcome measure found in EHR semistructured fields.
CST	Central subfield thickness (CST) is the measurement of the thickness of the central part of the retina (also called the fovea), typically determined using optical coherence tomography (OCT) imaging. CST is found in OCT image data and EHR semi-structured fields.

Treatment

Qdata Diabetic Retinopathy

Potential Applications:

Ways to Engage Us

* Data current to April 2026. Data counts represented are subject to change.
Data counts for research purposes are dependent on project scope and feasibility.

About Verana Health

Verana Health, Inc.® is a digital health company revolutionizing patient care and clinical research by utilizing physician expertise and artificial intelligence to unlock the true potential of real-world data. With exclusive access to the world's largest patient data sources in oncology, ophthalmology, neurology, and urology. Verana Health is powering real-world evidence generation. Clinicians utilize these insights to improve the quality of care and quality of life for patients, and life sciences companies rely on the insights to accelerate the development of new therapies.
