Verana Trial Connect

Identify eligible trial patients faster by unlocking the power of EHR data.

Verana Trial Connect (VTC) reduces overall trial burden on sites by automating eligibility chart review and providing practices with a curated list of pre-screened patients.

Verana Health's role as the strategic data and analytics partner of the American Academy of Ophthalmology IRIS® Registry (Intelligent Research in Sight) enables them to search structured data (e.g., diagnosis codes) and unstructured data (e.g., clinician notes) with a bespoke algorithm tailored with the specific study criteria to surface potentially eligible patients.

For Study Sponsors and CROs

Expedite study recruitment with a cloud-based application that accelerates and supports enrollment at the site level. Verana Health works with your team to create an algorithm that searches EHR data depending on study inclusion and exclusion criteria to identify potentially eligible patients. VTC accelerates pre-screening by:

- Providing sites with a simple, curated list of patients that match your study criteria
- Enabling sites with workflow tools that can provide visibility into why patients aren't qualifying
- Being easy to operationalize, requiring no contracts or IT set up for sites

> *Verana Trial Connect is a great starting point that filters a high volume of patients to match to the [inclusion/exclusion] criteria."*

For Trial Investigators

Easily tap into the data your practice has contributed to the IRIS Registry to accelerate patient enrollment at your trial site. VTC is a compliant tool that leverages your EHR data and reduces the cumbersome chart review by:

- Automating pre-screening by clearly surfacing patients that match protocol criteria
- Enabling more efficient pre-screening with easy workflow tools that allow your staff to review potentially eligible patients with just a few clicks
- Not requiring any IT support, installations or EHR plug-ins, VTC is a simple to use web application
- Facilitating easy note capture and downloadable patient lists to share details back with your team or the study sponsor

Our ophthalmologists see hundreds of patients daily, therefore Verana Trial Connect has allowed us to narrow down potential patients for the trial. Patients are generally very receptive to our invitation to participate in the study and are oftentimes eager to start! The portal has been very easy to navigate and update throughout the course of the trial as well."

– Lead clinical research coordinator

About Verana Health

Verana Health® is revolutionizing patient care and clinical research by unlocking the potential of real-world data. Verana Health has an exclusive real-world data network of 90 million de-identified patients from more than 20,000 clinicians, stemming from its exclusive data partnerships with leading medical societies. Verana Health harnesses deep expertise, secure advanced technology, and direct access to exclusive, near real-time data sources to deliver actionable quality insights that help companies make sense of the data.
